Can-Am Challenge – 6h Endurance race

Non just a 6 hours race but much more than that...

Date venue:
Location:
Kind of race:

the 22nd/23rd of September 2018
Polesine Parmense (PR) Italy
Three Drivers Team Endurance Race

High Quality Slot Cars 100% Made in Italy

The race will be developed over two days with:

- three 2 hours race (one for each model) on **Saturday**, that will establish the..
- **Sunday** 6 hours race starting grid

*The new model **McLaren M6A** not yet in shops will be send for free to each team when subscribed*

SATURDAY

After free practice, the qualifying session will take place, which will determine the starting batteries of 3 preparatory mini endurance races.

The team that has obtained the best result will have the right to choose the track and the starting lane. The others will position themselves consecutively on the same track on following lanes.

Qualified teams from position 9 on will be assigned lanes starting from the first lane of the following track of the one chosen by Pole Position Team.

For subsequent races the starting grid will be the same as the first race.

The duration of these stints will be 2 hours each, to be carried out with the three **ThunderSlot** models: a stint with the **Lola Can-Am**, one with the **Lola T70 MK III Coupé** and one with the new **McLaren M6A Can-Am**. The driving turns for each driver in these three races must have a total number of runs not less than 7 and not more than 9.

These 3 races, in addition to giving the possibility to each team to test their cars in the race conditions, will determine which of the 3 cars to use in the **Can-Am Endurance of 6 hours** on Sunday. It will also allow access to a bonus in laps that will give an advantage to the crews. The bonus equal to 1:10 will be proportional to the result obtained in the sum of the 3 preparatory races.

For example:

Team A

stint laps 1 - 421

stint laps 2 - 470

stint laps 3 - 450

dividing the number of laps by 10 we will get

stint laps 1 - 42.1 (rounded to the highest number 43)

stint laps 2 - 47

stint laps 3 - 45

Total bonus rounds = **135**

In practice, the bonus of 1:10 gives the opportunity during the preparatory races, to lose only 1 lap on a real pit stop of 10 laps.

High Quality Slot Cars 100% Made in Italy

These stops will allow the model to be optimized for the best 6 hours.

SUNDAY

In the Can-Am Endurance 6h the Teams will start each one with their own bonus.

TECHNICAL RULES for the THUNDERSLOT CAN-AM CHAMPIONSHIP

The technical rules here applied are based on "stock box" cars with some derogation as listed below.

Motor and tires will be provided under "Park fermé" from the Race Organization.
