TUNING

- 1. TUNING THE HANDLING CHARACTERISTICS**
Changing the magnets and distance plates offers individual tuning possibilities – for the beginner who needs strong road grip as well as for the professional driver requiring more sliding and drifting action.
- 2. REMOVABLE, REPLACEABLE ENGINE TRANSMISSION BLOCK**
Different transmission ratios, tires and high performance engines to change the car's maximum speed, acceleration and braking behaviour.
- 3. CARS COME WITH FRONT (XENON) AND REAR LIGHTING**
All Exclusiv cars are equipped with lights.
- 4. HEIGHT ADJUSTMENT OF THE CHASSIS**
Adjusts the ground clearance of the car's body in high banked curves and crossings.

NEW CAR TECHNOLOGY

- a) standard setting of the chassis - for flat track layouts
 - b) height adjustable chassis - for track layouts with high banked curves and crossings
- 5. HEIGHT ADJUSTMENT OF THE ROCKER BAR**
Increases the car's distance between the track and the body's front (improves passing high banked curves and crossings).
