Mr.COLOR GX

This paint features brighter color, higher foundation screening effect and stronger film than the former Mr. Color.
It may be mixed with the former Mr. Color and diluted with the conventional Mr. Color Thinner or Mr. Color Leveling Thinner.

Mr.CRYSTAL COLOR

Mr.Crystal Color can offer a totally different dimension of metallic sense from existing pearl paint or metallic paint.
The pearl color shows up in different shades depending on whether the base color is black or white.
Moreover, when clear paint is used for over coating, an extra special metallic texture can be achieved.

Mr.METAL COLOR

NET:10mL

It provides metallic feeling when the paint surface is polished. It has a surface like metal when the dried paint surface is polished with soft cloth, though it may be painted in the same way as the former Mr. Color. Note that the metallic feeling becomes different if clear paint is sprayed on it.

211 CHROME SILVER CHROME SILVER	212 IRON EISEN	213 STAINLESS ROSTEREISANTL	214 DARK IRON DUNKEL EISEN	215 COPPER KUPEER	216 BRONZE BRONZE	217 GOLD GOLD	218 ALUMINIUM ALUMINIUM	219 BRASS MESSING
--	-----------------------------	--	---	--------------------------------	--------------------------------	----------------------------	--------------------------------------	--------------------------------

Method of use

1. When using a brush, always paint in the same direction, eg. left to right, top to bottom.
2. After become dry, use a piece of gauze, tissue, an old cloth etc. to polish. You can create interesting effects depending on how you polish. Use different polishing techniques in each case, eg. no polished (for a mat effect), half-polished, very well polished.

COLOR MODULATION SET

The actual figure will look three dimensional because of the shading as light falls on it, but if nothing is done after painting, the figure can give a sort of flat impression, has little presence and becomes dreary.

The technique used to emphasize the stereoscopic effect by changing the tone of even just one color is called "Color Modulation".

In some cases where you have a small piece such as a model, it is not easy to see the change just by changing the color of each surface.

So gradation painting is used to emphasize the stereoscopic effect.

CS584 18ml×4colors

RUSSIAN GREEN VER.

CMC 10 SG RG CM BASE	CMC 11 SG RG HIGHLIGHT 1
CMC 12 SG RG HIGHLIGHT 2	CMC 13 SG RG SHADOW

Usage example of CS582 Dark Yellow VER.

Spray shadow (CMC06) in deeply recessed parts or around legs, and then paint overall with base color (Dark Yellow (C39)).
At this time, if you repaint in such a manner as not to paint over the deep parts sprayed beforehand so that the shadow of those parts can be seen feathering through, it will give a good accent.

After giving an overall coat using base color, let's start "Color Modulation".

Use Highlight 1 (CMC04) in such a manner as to leave a reasonable amount of base color showing, and when painting try to avoid having panels painted with Highlight next to each other.

STEP 1 BASE COLOR

STEP 3 HIGHLIGHT 2

STEP 2 HIGHLIGHT 1

STEP 4 SHADOW

Add high tones using Highlight 2 (CMC05) to increase contrast.

The areas painted should be smaller than the areas painted with Highlight 1 earlier on. When sufficient contrast is obtained with Highlight 1, it is possible to use Highlight 2 to paint bolt heads, small hatches or projecting components using a brush as accents.

Lastly, try to tighten up the overall impression if it becomes blurred with white spots from Highlight painting. Use Shadow (CMC06) to paint recessed areas (deep parts) to Highlight. If Shadow is sprayed on too heavily, the contrast between bright parts and dark parts tends to be extreme, so dilute the paint to make it a little weak, then paint on little by little while observing the results and avoid fixing the color with just one coat.

The point is to clearly define "sharp" and "shaded" areas.

When painting in different colors, tools such as paper, masking tape and transparent plastic sheets can be used. When painting panel lines in different colors, mainly paper is used (with white paper it is easier to check the painting results as you go).

Hold the paper with one hand and the airbrush with the other, and hold it over the part where necessary while

spraying paint.

Move the paper away occasionally to check the results and overspray gradually to achieve a good result.

Masking tape is used for complicated shapes including round parts.

Attach masking tape firmly to prevent it lifting up.

The usage method for transparent plastic sheets (vinyl chloride sheet, etc.) is the same as that for paper. Because it is transparent, it's easier to see where it needs to go to prevent it getting out of position.

WATER BASED COLOR ACRYSION

WATER-BASED ACRYLIC PAINT NET:10ml TO THIN:ACRYSION THINNER

This is an epoch-making paint that can be used for both brush painting and air brush painting.

Drying speed is faster than with the existing water based hobby colors, so work efficiency is improved dramatically.

Tap water can be used to dilute the paint, but we recommend use of our dedicated thinner in order to retain 100% of the original paint performance.

THINNER FOR Mr.COLOR

Dilute the Mr.Color with the exclusive thinner. The standard paint-to-thinner dilution ratio is 1:1.5 to 2 for painting with an airbrush.

Use Leveling Thinner for painting with an airbrush. (It is also available for brush painting.) It improves the paint flatness and provides a glossier surface, since it contains retarder.

It even provides mat surfaces when used for mat paint.

P121 **Mr.EPOXY PUTTY SUPER LIGHTWEIGHT TYPE**

NET 78g

T105
Mr.RETARDER MILD NET 40mℓ

Use this in cases where temperatures are high and Mr.Color dries too quickly, like in summer. Adding to Mr.Color by 10% or less reduces the drying speed of Mr.Color and prevents uneven and unsmooth brushing. (It may not be used for Aqueous Hobby Color.)

T113
Mr. TOOL CLEANER R 250 NET 250mℓ

This is a special liquid for only to clean tools like airbrushes and brushes. * It can not be used to dilute paint.

T118
Mr. BRUSH CLEANER LIQUID NET 110mℓ

Special brush cleaning liquid. It will dissolve even hardened paint on a brush with its strong cleaning power. This liquid offers a rinsing effect, so the brush tip can be maintained too. After rinsing the brush with the liquid, even Mr. MASKING SOL NEO attached to a brush can be peeled off neatly. * It can not be used for airbrushes.

MJ200 **Mr.SSP PUTTY**

T114
Mr.PAINT REMOVER R NET 40mℓ

This is an exclusive paint peeler. Rub paint lightly with a brush or swab moistened with the peeler to peel off paint.

T115
REPLENISHING AGENT FOR Mr.COLOR NET 250mℓ

This product is a replenishing agent for restoring Mr.Color that has higher viscosity or is dried in a bottle. Since coating resin that is not included in Mr.Color thinner is included, the original performance of paint is restored. * This is for only Mr.Color.

MS231
Mr.MARK SOFTER NET 40mℓ

This is a softener for softening decal and sticking it to curved or irregular surfaces. Apply a small amount of mark softer on decals which is applied on parts. Wait for a minute or so and press the decal lightly with cloth or the like to stick it.

MS232
Mr.MARK SETTER NET 40mℓ

This can be used for to stick decals firmly on parts because it is including adhesive component. Using it with the mark softer :
1) Apply the mark setter to the position where decal is to be stuck.
2) Stick a slide mark.
3) Spread it evenly and remove water with a swab, etc.
4) Apply the mark softer on it, remove water again, and dry it.
5) Pierce air bubbles with a thin needle if the decal has air bubbles. Apply the mark softer on the air bubbles and stick it.

M132
Mr.MASKING SOL NEO NET 20g

This remains elastic rubber even after drying and is suitable for masking in a wide area. Dried film cannot be cut with a design knife or the like.

M133
Mr.MASKING SOL R NET 20g

It is possible to apply it on the paint surface and cut off excess parts with a design knife or the like to make any masks as you like. Both M132 and M133 are water-soluble.

AIRBRUSH SYSTEM FOR GUNDAM MARKER

Planned by BANDAI SPIRITS CO.,LTD Hobby Products Department
©SOTSU·SUNRISE

GMA01 GUNDAM MARKER AIRBRUSH SYSTEM

- For more information on how to set up and start using, read the instruction sheet provided.
- The surface of ABS may crack if painted with this product.
- When using this product indoors, keep the room well ventilated.
- This product can be connected to Mr. Linear Compressor L5, L7, L3 and L3 Black.

GMA-01K SPECIAL REPLACEMENT NIB FOR GUNDAM MARKER AIRBRUSH SYSTEM

HOW TO GET STARTED

1

Connect the air cartridge and hose with the air valve.

2

Fill the tip of the Gundam Marker with ink by pumping it a couple of times against a painting dish.

3

Place the marker on the airbrush.

4

Carefully position the tip of the marker at the same level as the tip of the airbrush.

5

Tighten the air adjustment screw to release the air, and push the air button to let the paint come out.

GUNDAM MARKER

Planned by BANDAI SPIRITS CO.,LTD Hobby Products Department ©SOTSU·SUNRISE

GM01 ~ GM03

GUNDAM MARKER

For ink drawing (Ultra thin pen point)

3 colors (see also color sample)

Gundam marker for ink drawing is super thin for painting engraved lines, and they can give you a more mechanical looking finish. Paint run off can be erased with a rubber eraser. The marker ink fixes really well, so it is extremely easy to use. 3 colors are available, so you can use them for wide range of purposes.

- Black : For parts with dark colors like blue and gray
- Gray : Optimum for white parts
- Brown : For gold plated and red parts

Gundam marker for painting is a popular marker with which you can reproduce the original colors of Gundam and BB Warriors easily. The pen point is a "flat core" that is most suitable for detailed painting, and a good color and smooth coverage alcohol type paint is used. 6 metallic colors, 3 fluorescent colors, 7 special colors and an eraser pen, a total of 17 varieties are available.

GM300 ERASURE MARKER

This is a removing liquid of pen type which removes GUNDAM MARKER painted onto the parts. You can dare to paint the small parts carelessly and then remove the excess paint.

GM20 · GM21

GUNDAM MARKER for ink drawing (Wipe off type)

2 colors (see also color sample)

Gundam marker ink drawing brush pen is the ultimate marker for ink drawing the finer engraved lines. It has a brush type pen point, so you can paint any detailed engraved parts. Furthermore, special water-based ink is used, so you can over paint it on Mr. Color, Aqueous Hobby Color and ACRYSION and any paint run off can be wiped off with a cotton bud, etc. This pen has the power to increase the reality of any kind of model.

GM 169 PURPLE	GM 170 TITAN'S BLUE	GM 171 CHAR PINK 2

GP01 GUNDAM INK DRAWING PEN "SHARP"

Recommended by GUNPLA master-hand, Kawaguchi. Super easy ink drawing in the recessed line moldings on GUNPLA. You can draw in the recessed mold lines smoothly with ink using the ultra thin pen point of 0.3mm. You can get a sharp and realistic look easily even without painting. Paint run off can easily be removed with a rubber eraser. This is a mechanical pencil type ink drawing pen.

GP02 EXTRA LEAD FOR "SHARP" (10PCS)

©SOTSU·SUNRISE

GM301 ~ GM303 GUNDAM MARKER POUR TYPE BLACK

3 colors (see also color sample)

You can pour ink into the mold only by putting the tip of the pen. You can use a rubber eraser for the excess paint.

GM 301 BLACK	GM 302 GRAY	GM 303 BROWN
-----------------	----------------	-----------------

GUNDAM MARKER LINER "SHARP" TYPE / BRUSH TYPE

Mark the mold lines for a sharper and more three dimensional appearance. Choose the right color of the marker according to the color of the plastic parts. Use the black marker for dark colored parts, gray marker for light colored parts and brown marker for reddish colored parts. You can easily ink in your Gunpla for more realistic appearance by using the pour type Gundam Marker.

The Liner type marker can be used to ink in your Gunpla by drawing over the engraved lines.

The Brush type can be applied by letting the ink run down the engraved lines, or coloring the entire surface of plastic parts and wipe off after.

The excess ink can be removed with an eraser if the plastic parts are unpainted.

Put the tip of the marker against the engraved line, and press the pen gently to allow the ink to come out and run down along the line.

The excess ink can be easily removed with an eraser.

The excess ink can be easily removed with an eraser.

DS001 Mr.TURN TABLE L

- Rotation speed : 2 step switching (2.0/1.0 rotations per min.)
- Power supply : AA dry cell batteries × 3 (available separately)
- Capable of load : up to 2kg

Mr. Turn Table can be used for large sized models, with its diameter of 189mm. Using a switch you can select between 2 rotation speeds (low/high). The table part has a mirror finish offering a touch of class.

VANCE MATERIAL

VANCE ACCESSORIES LED MODULE

VANCE ACCESSORIES LED MODULES are easy-to-setup LED lights; simply joint the sockets together. You can create an illuminating plastic model with no fuss; there is no need to calculate electric power and solder the cables.

VAL-01 1608 CHIP LED

Chip LED

1608 CHIP LED can be placed on different parts of your plastic model as it is small, so it can be easily installed even if it is your first time installing LED lighting. Although the lightbulb is small, it gives a high light luminance.

1608 CHIP LED lightbulb has been soldered onto the end of the cable.

VAL-02 3mm SHELL TYPE LED

3mmLED

An artillery shell shaped LED with outer diameter of 3mm has been modularized to make VAL-02 series. It can be easily installed by simply drilling with 3mm wide pin vice where you want to put the LED. As it is more suitable to be installed on the exterior of the plastic model than the CHIP LED, we have chosen the bulb color to be clear, so that it would not spoil the overall appearance.

Artillery shell shaped 3mm LED lightbulb has been soldered onto the end of the cable.

A full set of Mr. LINEAR COMPRESSOR L7 with airbrush PS-289 Mr. PROCON BOY WA PLATINUM Ver.2.

Mr.LINEAR COMPRESSOR L5 / L7

PS251 Mr.LINEAR COMPRESSOR L5

- STANDARD PRESSURE 0.1Mpa
- MAXIMUM PRESSURE 0.12Mpa
- STANDARD VOLTAGE AC100V
- AIR ASPIRATED 5.27Lit/min
- STANDARD FREQUENCY 50/60Hz
- OPERATION CONTINUOUS
- SIZE 160 (L) × 120 (W) × 160 (H)
- WEIGHT 2.4kg

An epoch-making compressor with linear-driven free piston. Low noise makes this compressor ideal even at night and can be run continuously 24 hours.

PS254 Mr.LINEAR COMPRESSOR L7

- STANDARD PRESSURE 0.1Mps
- MAXIMUM PRESSURE 0.15Mpa
- STANDARD VOLTAGE AC100V
- AIR ASPIRATED 7.0Lit/min
- STANDARD FREQUENCY 50/60Hz
- OPERATION CONTINUOUS
- SIZE 170 (L) × 142 (W) × 185 (H)
- WEIGHT 2.9kg

PS306 Mr.LINEAR COMPRESSOR L5 / PS290 AIRBRUSH

A full set of Mr. LINEAR COMPRESSOR L5 with airbrush PS-290, Mr. PROCON BOY LWA TRIGGER TYPE.

PS321 Mr.LINEAR COMPRESSOR L5 / PS274 AIRBRUSH

A full set of Mr.LINEAR COMPRESSOR L5 with airbrush PS264 Mr. PROCON BOY WA 0.3mm for those who want to enjoy airbrush painting.

PS310 Mr.LINEAR COMPRESSOR L5 / REGULATOR

A good set for those who have never used a compressor. This popular set of L5 includes a Mr.AIR REGULATOR and a Mr.AIR HOSE / PS STRAIGHT

PS313 Mr.LINEAR COMPRESSOR L5 / REGULATOR IV

A set of Mr.LINEAR COMPRESSOR L5 and Mr.AIR REGULATOR IV. The attached mounting base offers compact installation of the regulator and stand.

PS307 Mr.LINEAR COMPRESSOR L7 / REGULATOR

A set of Mr. LINEAR COMPRESSOR L7, Mr. AIR REGULATOR and Mr. STAND & TRAY SET II.

PS319 Mr.LINEAR COMPRESSOR L7 / PS270 & 289 AIRBRUSH

A full set of Mr. LINEAR COMPRESSOR L7 with airbrush PS270 & PS289.

PS-351KP Mr.LINEAR COMPRESSOR L3 BLACK

- STANDARD PRESSURE 0.05Mpa
- MAXIMUM PRESSURE 0.085Mpa
- AIR ASPIRATED 3.0Lit/min

PROCON BOY WA DOUBLE ACTION

03 nozzle
10cc cup
DOUBLE ACTION TYPE

- 1 AIR IMPROVEMENT MECHANISM
- 2 AIR ADJUSTMENT SYSTEM
- 3 SEMI-EASY SOFT BUTTON

It regulates the air flow so that stable operation is enabled even at low air pressure.

The spray can be easily adjusted for metallic colors, quick drying paint, and other paint characteristics by simply controlling only airflow - no pressure adjustment is needed. Push down the button to adjust the fineness of the needle without paint squirting out when pulling the button. This enables smooth spraying whenever you pull the button.

PS267 Mr.PROCON BOY FWA DOUBLE ACTION TYPE

**PROCON BOY FWA
DOUBLE ACTION**

An ultrahigh-precision airbrush featuring a 0.2 mm nozzle diameter. This airbrush delivers great performance for ink-spot dazle and fine-gradation painting. This is the first small-diameter model with 10-cc cup. This airbrush has a 1/8 (S) mouth with joint for PS (fine)

**02 nozzle
10cc cup**

DOUBLE ACTION TYPE

PS265 Mr.PROCON BOY SAE SINGLE ACTION TYPE

**PROCON BOY SAE
SINGLE ACTION**

An airbrush with dial for easy spray adjustment by one thumb. This airbrush has a 1/8 (S) mouth with joint for PS (fine).

**03 nozzle
7cc cup**

SINGLE ACTION TYPE

PS266 Mr.PROCON BOY LWA DOUBLE ACTION TYPE

**PROCON BOY LWA
DOUBLE ACTION**

The perfect airbrush for spraying a metal color or surface layer over a large area. This airbrush provides stable spraying even under low pressure. The 15-cc large cup of the direct-mount type makes it easy to wash. This airbrush has a 1/8 (S) mouth with joint for PS (fine)

**05 nozzle
15cc cup**

DOUBLE ACTION TYPE

PS268 Mr.PROCON BOY SQ SINGLE ACTION TYPE

**PROCON BOY SQ
SINGLE ACTION**

This airbrush has all the standard requirements for an airbrush for beginners at an amazingly low price. Paint spray thickness is easily adjusted with the dial on the back of the unit. This airbrush has a 1/8(S) mouth with joint for PS(fine).

**04 nozzle
7cc cup**

SINGLE ACTION TYPE

PS-268AB PROCON BOY SQ LIGHT ALUMINIUM SKY BLUE

**PROCON BOY SQ LIGHT
SINGLE ACTION**

PS-268AR PROCON BOY SQ LIGHT ALUMINIUM WINE-RED

The weight has been significantly reduced by changing the material of the main body and paint cup from brass to aluminum (former type (PS268) 139g → 73g). The main body is alumite processed, and the surface is coated in a bright beautiful color tone.

**04 nozzle
7cc cup**

SINGLE ACTION TYPE

PS253 Mr.AIR REGULATOR / STAND

An essential item for airbrush painting equipped with decompression, draining, and branching functions.

PS259 Mr.AIR REGULATOR III

An installation-type regulator mounted on Mr.STAND. This regulator can not only be used for L5, L7 and L10, but also for other low-pressure compressors.

PS234 Mr.AIR REGULATOR WITH STAND FOR L5 & L7

PS282 DRAIN & DUST CATCHER

Even when using a regulator, water droplets can still collect on the inside of hoses during the humid rainy season. Connect this to your airbrush as an additional second defense against water droplets.

PS382 DRAIN & DUST CATCHER LIGHT

Comparison of weight from the former type : PS282 40.5g ▶ PS382 24.0g

PS288 DRAIN & DUST CATCHER II

Attached to your airbrush this combination of hand-grip and airfilter gets you better results by enabling you to regulate air flow by hand.

PS388 DRAIN & DUST CATCHER II LIGHT

These are Light type of PS282 and PS288, aluminum is used for the main body, so the stress on the wrist is reduced and work efficiency is improved.

Comparison of weight from the former type : PS288 51.3g ▶ PS388 30.0g

PS-290B 150cc CUP for PS290 and PS275

PS991 AIRBRUSH MAINTENANCE SET

PS283 Mr.ONE TOUCH JOINT 1/8 (S)

PS281 ONE TOUCH PLUG - 1/8 (S) for Mr.ONE TOUCH JOINT

PS241 Mr. HOSE JOINTS 3 PCS

JOINT 1	JOINT 2	JOINT 3
1/8(S)	1/8(S)	1/8(S)

PS246 Mr.AIR HOSE 1/8 (S) STRAIGHT 2M

PS247 Mr.AIR HOSE 1/8 (S) SPIRAL 1M

PS-290G ADDITIONAL GRIP for PS290

PS256 Mr.STAND

PS229 Mr.STAND & TRAY SET I

● TRAY SIZE : 165mm×93mm

PS233 Mr.AIR REGULATOR STAND FOR L5 & L7

This hand grip is suitable for PS290 Airbrush. It has an excellent grip, so it would make it easier to hold and use the airbrush. There is no need to use any tool to place the hand grip onto the airbrush. Other additional parts, such as hose and joints, can be used together.

PS230**Mr.STAND & TRAY SET II**

● TRAY SIZE :
196mm×136mm

**PS257 Mr.CLEANER BOTTLE****■SF285, B506 Mr.SURFACER 500**

This coating is useful for filling in bumps and dents in plastic models, scratches and for removing bubbles and finishing bases. It is suitable for large scale repairs and can be used as soluble putty.

■SF284, B505, B519 Mr.SURFACER 1000

Mr.SURFACER 1000 contains finer granules than Mr.SURFACER 500. They are both used in much the same way but, due to the finer granules, after sanding with waterproof sand-paper a perfectly corrected surface is possible. Available in bottle and as spray.

■B515 Mr.SURFACER 1200

Mr.SURFACER 1200 contains finer granules than Mr.SURFACER 1000. They are both used in much the same way.

■B511 Mr.WHITE SURFACER 1000

Since it is white, Mr.WHITE SURFACER is used to modify plastic model parts that are black or dark in color. If this is used on the entire model, only a thin over-coat of paint in the desired color is necessary.

■SF283, B518 Mr.BASE WHITE 1000

Mr. BASE WHITE is useful for making a black, red or other dark-colored surface white. This newly developed product uses special pigments to completely hide the base color and aids application of detailed finishing and top coats. Because it also works as a surfacer, it can be used to hide small imperfections.

■B524, SF287 Mr.PRIMER SURFACER

This is a surfacer with primer.
The material used in Surfacers 1000 has been improved for this product.
Surface attachment has been enhanced not only for plastic models but also for metal in etched parts and resin.
Color is gray.

■B525 Mr.OXIDE RED SURFACER

This surfacer has reproduced the rust-proofing color used as the base color on tanks.
Base coat painting on tanks can be done in one go, so that you can start painting the exterior within a shorter time.
This product has the same grade as the widely used Surfacers 1000.

■Differences between B518 Mr.BASE WHITE 1000 SPRAY and B511 Mr.WHITE SURFACER 1000 SPRAY

Both items are used in almost the same way, but the amount of pigments is different.
B518 contains less granules but more white pigments than B511, so it is great for filling in bumps and dents and you get a whiter surface than with B511. B511 on the other hand contains more granules, so it is easier to fill in scratches with it. Its color is a bit greyish.

■SF288, B526 Mr.FINISHING SURFACER 1500 BLACK

This is a black version of the Finishing Surfacers.
This black base allows the omission of the painting of a black coat before applying a metallic color and reduces the thickness of painting.

* This is not suitable for finishing before painting on SM08 Plate Silver Next. It is necessary to apply a gloss black paint separately or polish the surface.

■SF289, B527 Mr.FINISHING SURFACER 1500 GRAY

This surfacer can be applied to give a final finish to the surface more smoothly.
It has the characteristic of being fine grained and it is not prone to clogging up details in the mold. Most suitable not only for making a base before painting but also for surface finishing of an original mold before casting.

■SF290, B528 Mr. MAHOGANY SURFACER 1000

Surfacer in mahogany color (dark brown).
This surfacer can be applied to smooth the surface and it can also be applied as a dark brown base paint shading color, this gives depth to the end result after the basic color is applied on top.

■T302, 303 ACRYSION THINNER

Thinner for new water based color "ACRYSION". Dilution ratio is 3 paint: 1 thinner when you paint by airbrush.

■T106, 108 Mr.COLOR LEVELING THINNER

Mr. LEVELING THINNER is excellent for spray (airbrush) applicators. Mixing Mr. LEVELING THINNER into Mr. COLOR at a ratio of 1:1 or 1:2 improves coat leveling and increases shine. When drying is slow because of insufficient air current during winter months, it is best to mix Mr. COLOR THINNER into Mr. LEVELING THINNER. The mixture will be dry to the touch after a period of about 10 minutes.

■T117 Mr.RAPID THINNER

Drying speed when an air brush is used is faster than with the regular thinner, and when metallic paint is used in particular, metallic particles are aligned evenly to produce a neat glossy surface. This is also suitable for dilution of surfacer and mat paint, and also for camouflage painting and gradation painting.
* Because of the fast drying speed, we do not recommend this for glossy paint types other than metallic painting. Please use Mr. Leveling Thinner for glossy painting.

■SM201 - 206 and SM08 Mr.COLOR SUPER METALLIC

The SUPER METALLIC Series is a metallic paint, which uses high class fine metallic particles.
The base material used is the same as that for Mr.Color.
• Please use T106, T108 Mr.Color Leveling Thinner or T117 Mr.Color Rapid Thinner for paint dilution and airbrush painting.
• For airbrush painting, dilute paint with thinner to a ratio of 1 paint : 1~2 thinner (excluding SM08).

• For further glazing, coat the surface using B513 Super Clear Gloss, etc (excluding SM206 and SM08).

***Notes**

- For SM206 and SM08, be sure to apply Mr.Color black (gloss) as a base coat color before painting in order to give a metallic touch.
- In case of SM206 and SM08, clear paint can not be applied over the painted surface (it dulls the color).
- Metallic particles tend to set easily, so stir well when thinning and even during painting.
- Needle airbrushes tend to clog easily with metallic particles, so do not attempt an extremely fine spray. Use an airbrush with a bore diameter of over 0.3mm.

■CR1. CR2. CR3 PRIMARY COLOR PIGMENTS FOR Mr.COLOR

Primary color pigments for Mr.Color are coating additives for which concentration of the three primary colors cyan, magenta, and yellow, that are raw materials of Mr.Color, is adjusted to allow color mixing with Mr.Color while keeping high purity. Since Primary color pigments for Mr.Color do not include any pigments that conceal foundation coat (such as white and black), these cannot be used as single units in a similar way to other paints, but these are useful for fine adjustment of tint of existing colors without making muddy, natural gradation coating with vivid color tone by making use of high color transparency, and metallic color toning.

Also by mixing it into GX100 Super ClearII, original clear colors can be made for coating clear parts.

*As used above

With Primary color pigments for Mr.Color, the intensity of coloring is in the order of cyan, magenta, and yellow (lowest). When mixing colors, be sure to add a higher intensity color little by little to a lower intensity color.

As the rate of addition of Primary color pigments for Mr.Color becomes higher, the ground masking capacity of color becomes lower.

For beautiful coloring, conduct undercoating with a color made by mixing C1 WHITE of the same quantity or twice to mixed paint. For beautiful painting surface finish, conduct wet-on-wet coating of a thinly diluted color little by little by suppressing the discharge of airbrush.

■GT65 Mr.LINE CHISEL

The line chisel is a precision cutting tool dedicated for chiseling lines.
Since the cutting edge is convex, this can be used to chisel easily to make thin grooves with uniform width.
Since the blade is detachable, it can be replaced, according to the application, with a different sized one that is sold separately.
