The Lotus 72, designed by Colin Chapman and Maurice Philippe in 1969 and refined into 1970, is one of the most important and iconic models in F1 history. It was a great technical achievement and was developed and raced until 1976. Like all the cars made by Chapman it set new standards in innovation: inboard brakes, side mounted radiators, torsion bar suspension, motor air intake positioned high beside and then above the driver's head, wedge shaped nose.
