HS chassis NEW

Technical Specifications

1. New Plastic modular chassis.
2. Adjustable front axle height.
3. Easy body mounting system.
4. Additional body post for third party plastic bodies.
5. Long Can motor mount. Screw fixed.
6. Optional suspension system.
7. Precut chassis to allow more or less flexible option.
8. Direct Scalextric SSD, Slot.it Oxygen or Carrera digital chip installation.*
9. Upgradable to complete metal SC-8003 GT3 chassis.
10. Use same body metal mounts as professional.
11. Standard with 2 magnets.
12. Fully adjustable wheelbase.
13. Bronze bushing replaceable with ball bearing option.
14. Universal post.

Length:
111 mm

Wide:
55 mm

Axle support width:
45 mm

Wheelbase:
96 - 112 mm

*Carrera, BRM, slot.it Oxygen, Scalextric SSD, are brand names used for consumer information only and that brands belongs to their respective trade mark owners.

Optional 3rd brands body fixings

NEW

DS-IST SYSTEM

New universal track system control for slot tracks system, to Bring the Fun into the Racing.

Expandable interface that allow a easy installation in a race that allows an easy track or a multilink connection between several tracks at the same time to run them all.

Each IST Box (master or slave) is connected to another one by a simple RJ45 ethernet connector and using Class5 ethernet wiring.

Each individual sensor can be programmed thought software to be used for lap counting, speed trap or split timing.

Easy and simple installation, only a small hole is required for the system installation, a hole next to the track lane of 7x3mm is needed

Full DS-IST v4 Software for race management and live streaming available to register and download from the new DS site humidity and temperature sensors integration.

Expandable Slave box up to 128 sensors.

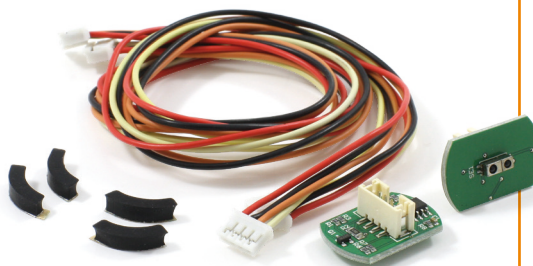

Full Smartphone and table real race time integration available.

Complete new website www.ds-racingproducts.com for full parts list of the range and software registration

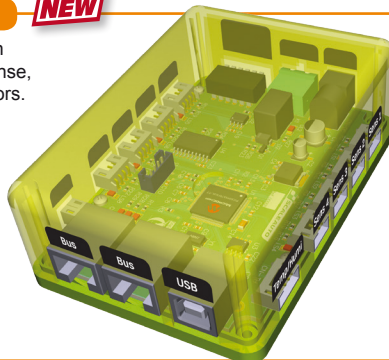

DS-2002 **NEW**

DS-Ist Sensor

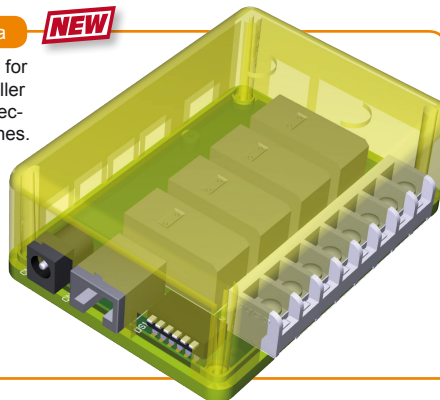

DS-2003b **NEW**

Master 8 with software license, up to 8 sensors.

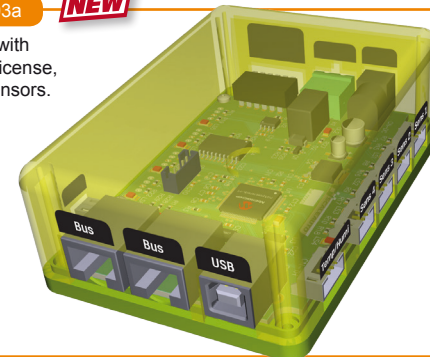

DS-2005a **NEW**

Control Box for track/controller wiring connection for 4 lanes.

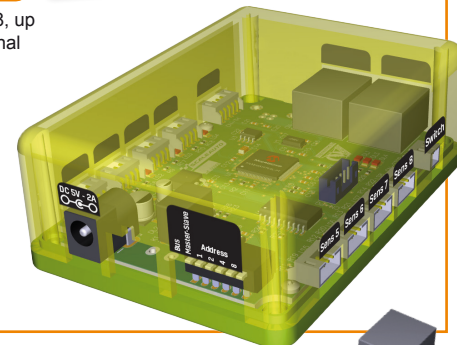

DS-2003a **NEW**

Master 4 with software license, up to 4 sensors.

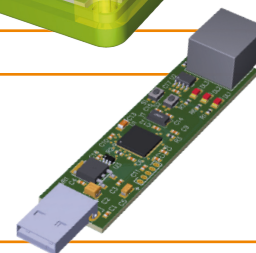

DS-2003c **NEW**

Slave Box 8, up to 8 additional sensors.

DS-2006 **NEW**

USB dongle Master 1 with software license, 1 RJ45 exit to extend to slave modules.

DS-2010 **NEW**

Upgrade box for DS-300 to IST system.

SCALEAUTO

Modular Slot Car Racing Pro Track System

This all NEW complete plastic track system for home or club use is the most important news on the hobby market since digital slot car racing was introduced. Not only because it has been based on a complete new design from scratch, with input from many individual experience customers, but also because this is what the market has demanded for a long time. This is a complete new track system giving a professional choice that is not a toy.

We are really enthusiastic about our development achievements which have given us full autonomy over the designs. We are able to produce a FULL PACKAGE of components enabling us to promote and develop our brand in all markets around the world.

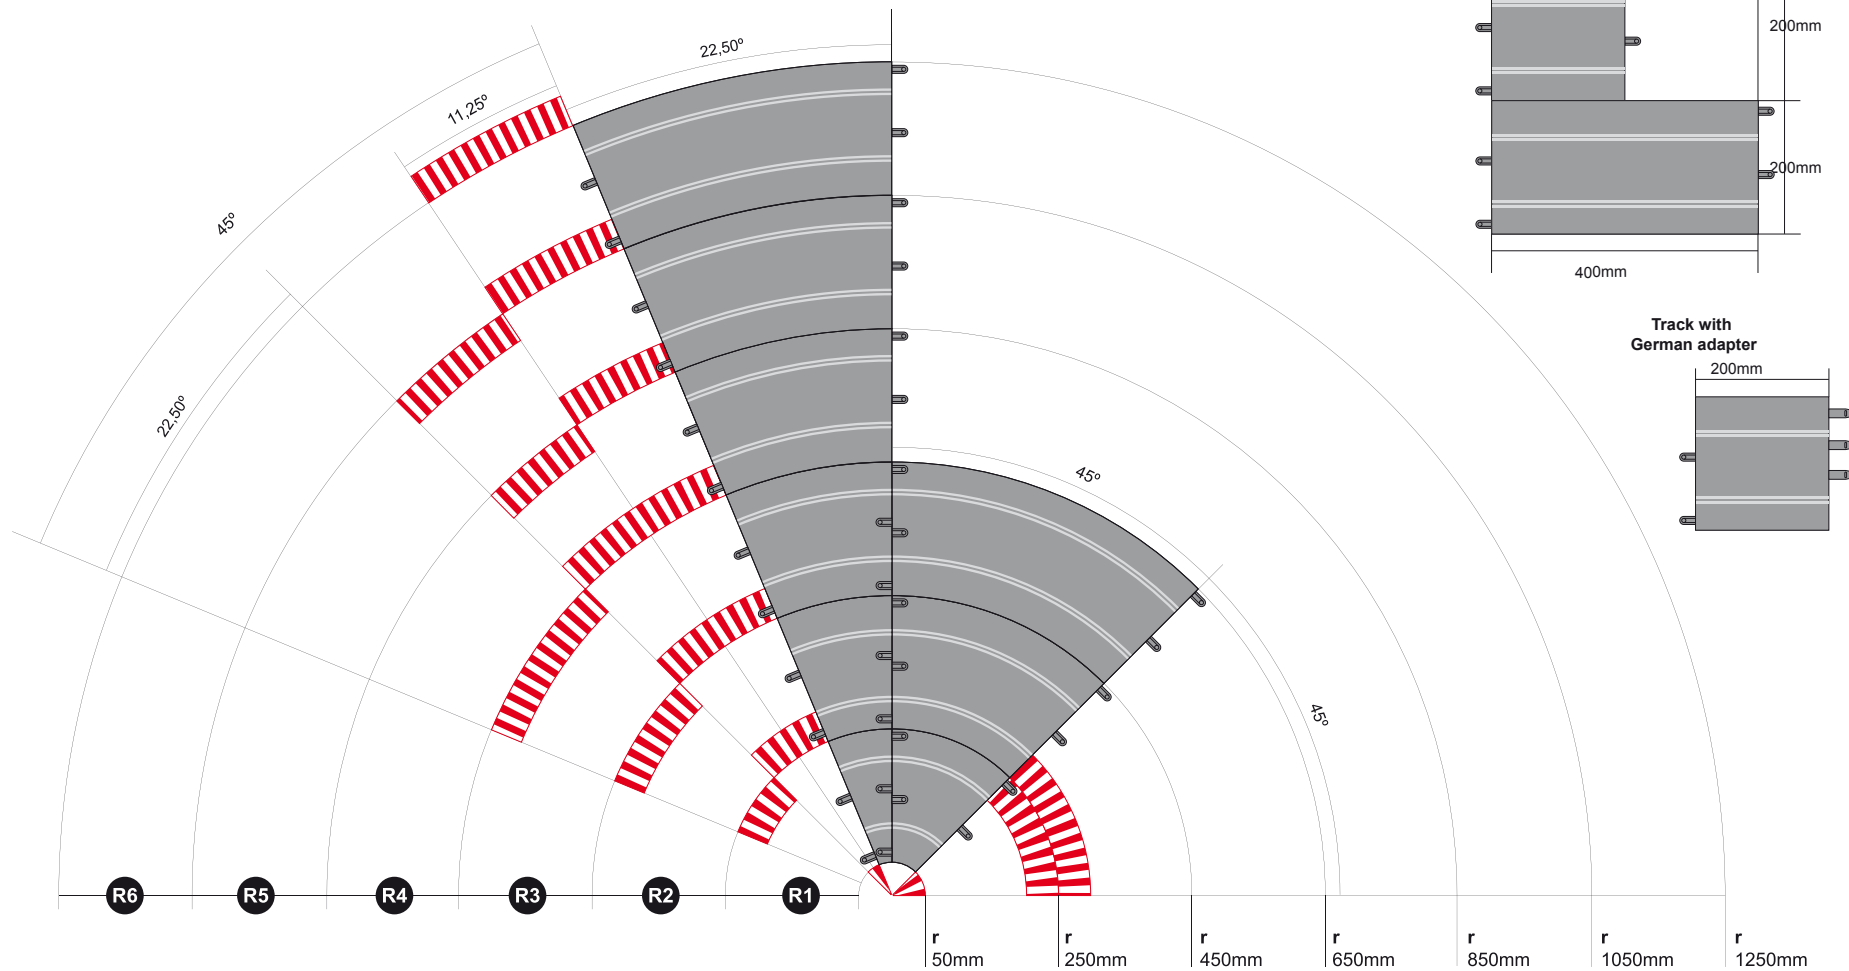

The main features of our new track system are:

- 10 cm between lanes: the largest available.
- Allows 1/32 and 1/24 cars.
- Solid structure, rigid plastic. Avoids cracking and noise.
- Perfect joints with spot welded spring steel connections to minimize power loss between sections.
- Easy to connect snap together joints.
- Up to 6 different corner radius. Unique in the market
- High grip surface to ensure a perfect grip for all kinds of rubber or sponge tyres.
- Fully compatible with existing 9.99cm lane distance German track.
- Compatible with all existing digital systems

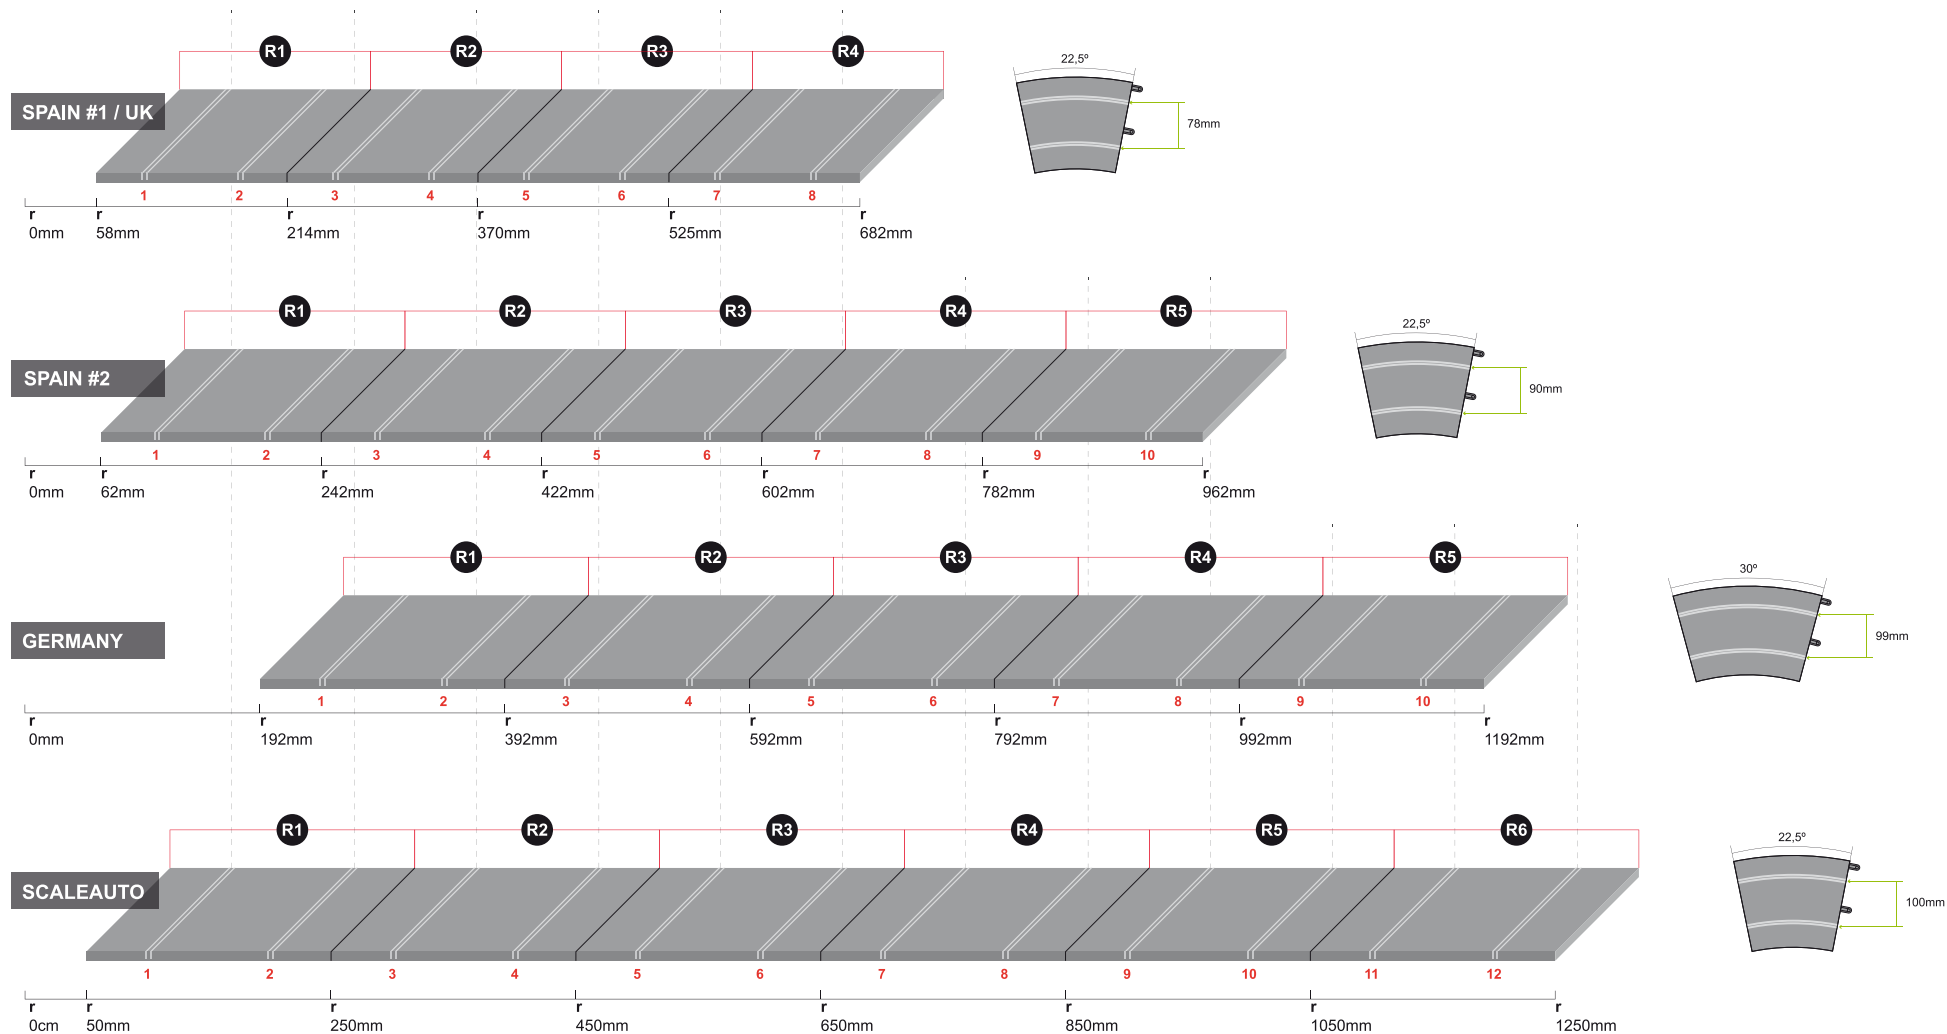

Development Stages:

- **Stage 1:** Summer time 2018
Will include tracks to allow up to 6 lane systems R2+R3+R4 with inner and outer extensions and walls.
- **Stage 2:** Christmas time 2018
More track sections will be released to enable up to 8 lane systems adding R1 and R5 with inner and outer extensions.
- **Stage 3:** Summer time 2019
Will see the addition of the R6 curve and special digital straight lane changing piece.
