Alfa Romeo 33/3

The Alfa Romeo Tipo 33 Sports Prototype was designed in the mid-1960s to race in the World Sports Car Championship. It succeeded and won the Manufacturers' Championship in 1975, and again in 1977.

Designed by Carlo Chiti, a famous Italian engineer, the several variants of the car were raced by the Alfa factory and by many privateers as well.

In 1971 it won three World Championship races: Brands Hatch, Watkins Glen, and Targa Florio.

The T33/3 cars featured a monocoque chassis, panelled in aluminium and magnesium, a V8 2994 cc. engine, and a 6 or 5 speed sequential gearbox.

Top speed reached 330 km/h.

Car n.54 is the winner of the 1000 Km of Brands Hatch in 1971.
